A Beautiful Way

To Run Effective Board Meetings With **Less Effort**

BoardPro board productivity software helps organisations spend more time on strategy and creating value, by running boards more efficiently with less effort. Deliver more impact, not admin.

Get Organised

Lacking organisation with countless emails and links to shared folders? Everything in one central and secure place with BoardPro.

Save Time

Tired of chasing things around email, dropbox, or spreadsheets? BoardPro consolidates everything into one easy system. Give up your ad-hoc processes for a best practice structure that's online and easy to use.

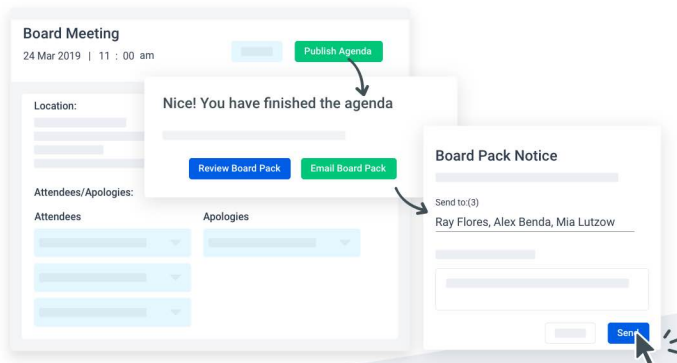

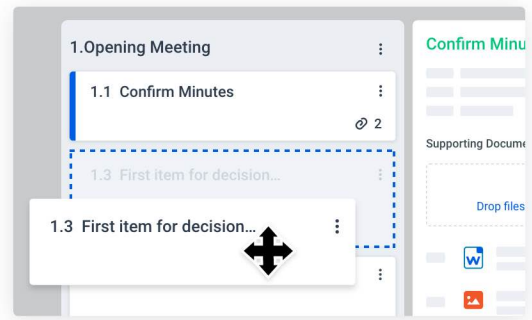

Reduce Hassle

Too busy to manage the board process well? BoardPro streamlines the entire board cycle. Halve your board administration and get time back.

Agenda Builder

Simplify the agenda building process and automate follow-up activities. Create your agenda, attach documents, and distribute via email. Customise your template to use every meeting.

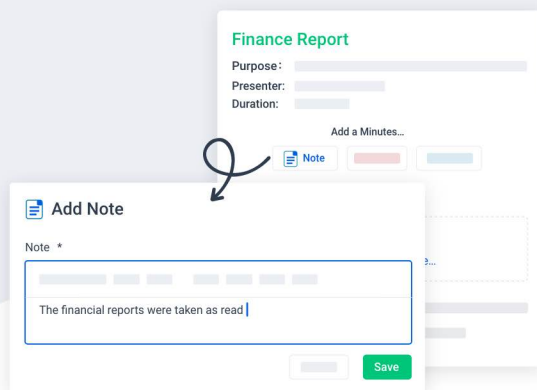

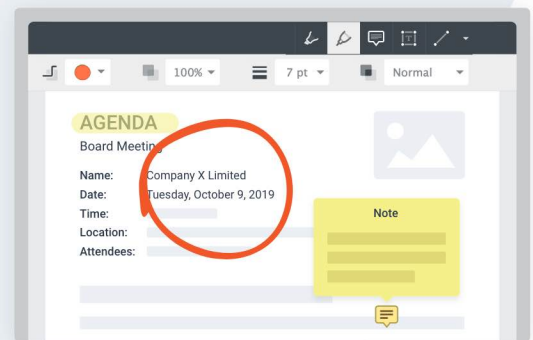

Board Pack Builder

BoardPro builds a single PDF board pack for each meeting and automatically inserts supporting documents added into your agenda. Distribute to the board in just a few seconds.

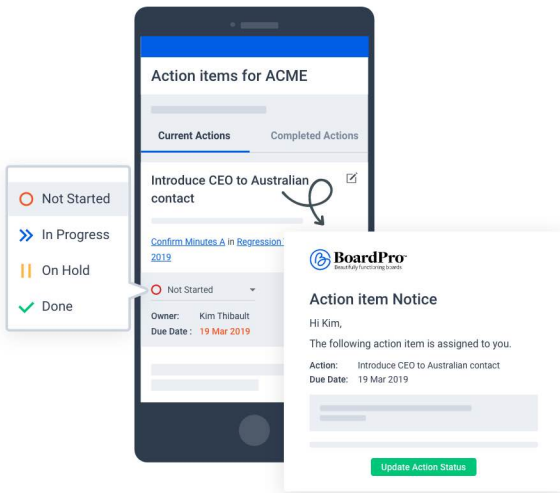

BoardPro Notes

Make private notes and capture your thoughts directly on the board pack. No need to print the board pack, or use a third-party app to annotate your files.

Minute Taking

Work more efficiently, while following good minute-taking practice. Enter minutes directly into BoardPro throughout the meeting, assigning actions and recording decisions made as you go. Easily distribute finalised Minutes and new Actions.

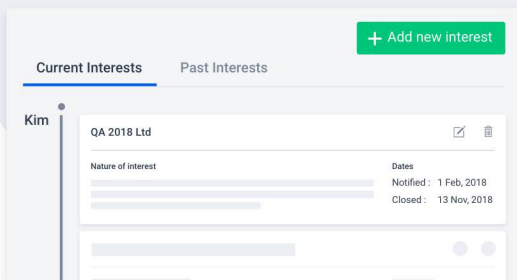

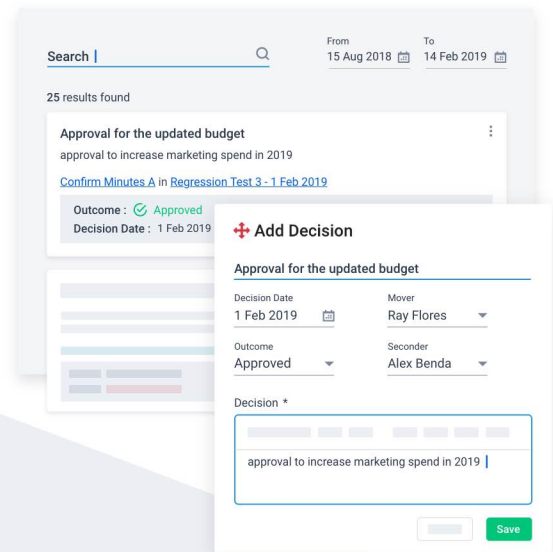

Set and forget Action items

Assign Actions in the meeting as you enter the Minutes, and notify members of their actions, The Action List records as members update completed tasks, and reminder emails help keep due dates on track.

Decision Register

The Decision Register auto-populates as decisions are made throughout your meeting. If you need to recall a previous decision, keyword search the register to find the information you need.

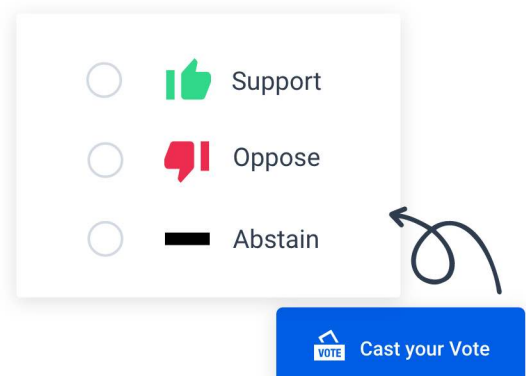

Interest Register

Members can manage their own Interests, with all changes reflected in the Interests Register in real time. Access up-to-date Interests, current and past, for each board member.

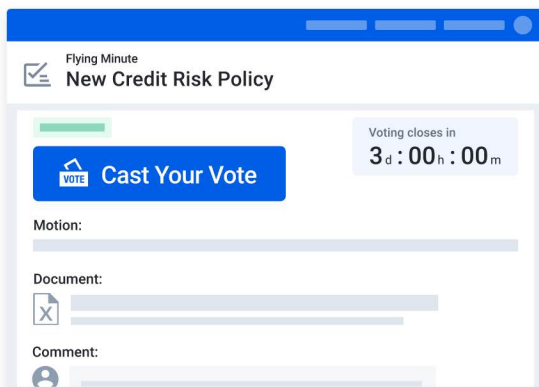

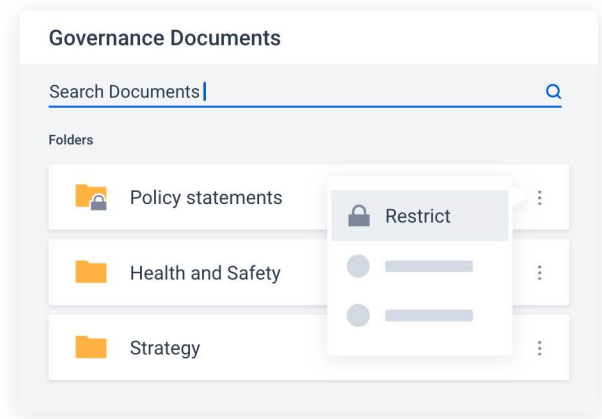

Voting

Add a vote in your agenda, and board members can cast their vote live during the meeting.

Document Repository

Store all your board documents and company policy documents. Find a document quickly via search, or link it directly to the agenda. Restrict access with “Board Only” folders for the board members only.

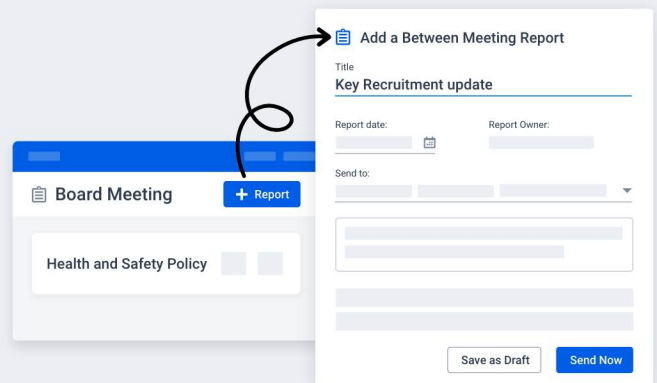

Flying Minutes

For getting board approval in between meetings, use Flying Minutes. Cast your vote online, and see the decision recorded in the minutes of your next meeting.

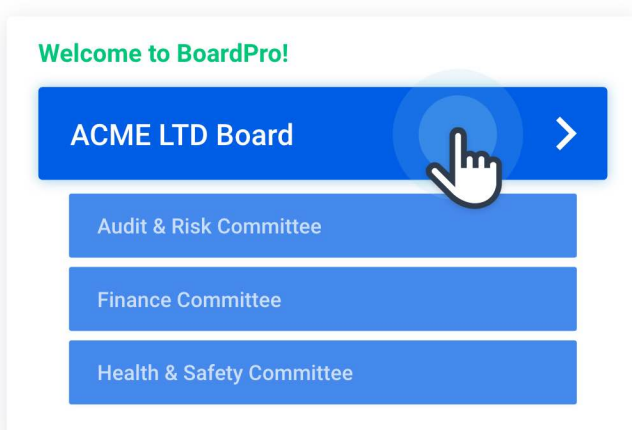

Between Meeting Reports

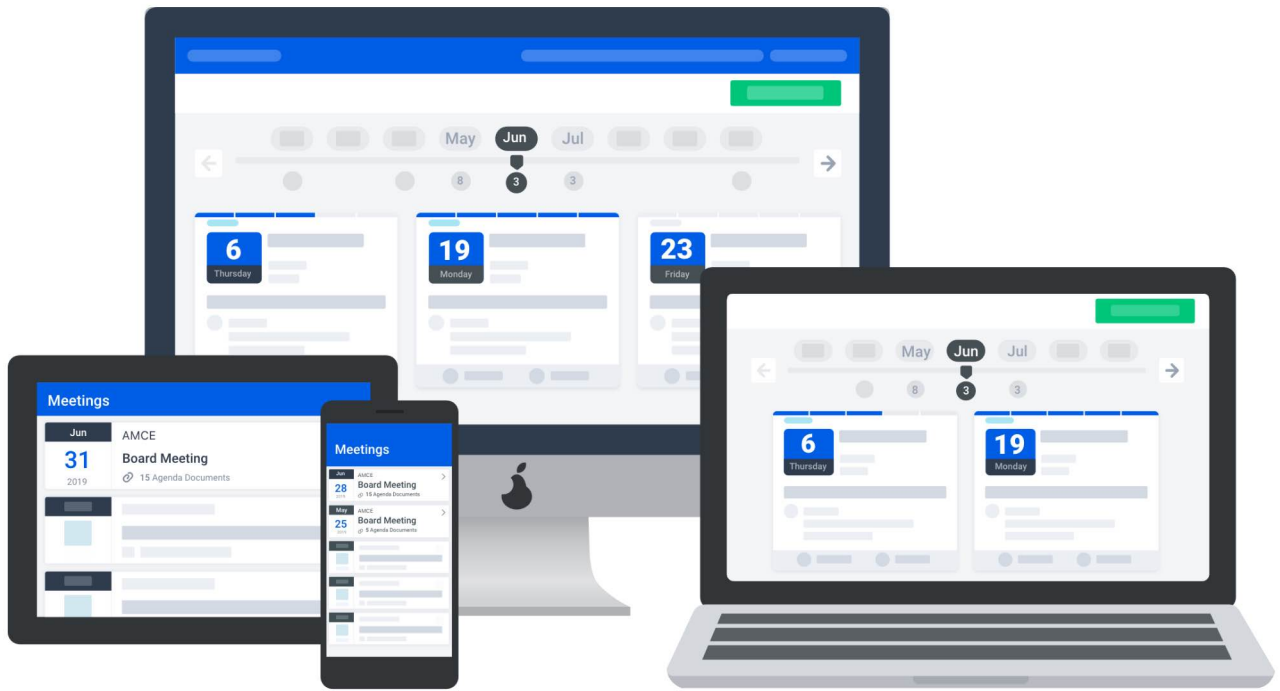

Send reports to the board outside of a board meeting. Comment and discuss the report with your colleagues, all while having your data stored securely.

Committees

Manage your sub-committees in their own dedicated committee account. Committees have their own people list, meeting workflow, document repository and Action Lists.

Accessible on **all devices**, via a web browser.

iOS mobile companion app available on the app store. Annotate and read your board pack on your iOS device.

Over **10,000** users globally.
